Certified Version

Nuggets Ltd have onboarded with ONFIDO for automated checks of physical security features.
Onfido solution has been certified under UKDIATF separately and is an accepted provider for this purpose.
DISC lab testing has shown Onfido to be capable of meeting the requirements for document scanning and validation.

Notes

Note it is expected that the documents referred to in ACCS Stage 2 report will be revised quite frequently. The named company's services will assessed for compliance with any revisions at each annual surveillance.

Endorsements & Limits of Jurisdiction

Applicable only in the jurisdiction of the United Kingdom of Great Britain & Northern Ireland.

Simple Explainer

We provide this 'simple explainer' for anyone reading or interpreting our certificates of conformity to assist with understanding. There is further information on our website www.accscheme.com or by calling our certification team on **0345 257 0018**.

The United Kingdom Digital Identity and Attributes Trust Framework aims to make it easier and more secure for people to use services that enable them to prove who they are or something about themselves. It is a set of rules for organisations to follow if they want to provide secure and trustworthy digital identity and/or attribute solutions.

In the context of this trust framework, a digital identity is a digital representation of a person acting as an individual or as a representative of an organisation. It enables them to prove who they are during interactions and transactions. They can use it online or in person. Services and organisations that let users use secure digital identities can better trust that those users are who they say they are.

Trust framework participants are be certified against a set of UK government-approved rules. This means that one organisation can trust that the information another shares with them is accurate and reliable. To meet the rules of the trust framework, a certified provider will need to prove they are able to safely manage users' digital identities or attributes.

This Schedule of Conformity sets out what this trust framework provider has been assessed against and the types of identity profiles that the organisation is certified to provide and for which purpose(s).

For more information about the framework, search gov.uk for 'Digital ID Trust Framework'.
